Specifications*

Electrical Ratings	
Maximum Contact Ratings	1 A, 125V AC 1 A, 250V AC resistive
Continuous 5 A (I_{th})	1 A, 28V DC resistive 1 mA, 5V DC low level 100 mA, 50 mV dry circuit
Mechanical Ratings	
UL Listed	File E14840 Guide NKCR
CSA Approved	LR1234 (operators), LR2923 (assembled panels)
IEC Compliance	IEC 144
Mechanical endurance	1 000 000 cycles
Contact material	Gold plate over silver
Contact bounce	3 ms (typical)
Electrical life	200 000 cycles at rated load
Dielectric strength	1000V RMS at sea level
Environment	
Temperature range Note: Operating temperature ranges below +32°F (0°C) are based on the absence of freezing moisture and liquids.	Operating: -20...+45°C (-4...+113°F) Storage: -30...+85°C (-22...+185°F)
NEMA Types	1, 3, 12, and 13; IEC 144, IP65
Construction	
Circuits	1 N.O. - 1 N.C., SPDT Double-break contacts
Contact terminals	Gold-plated, solderable, quick connect stabs 0.110 x 0.020 in. or PC board/wire wrap pin 0.020 x 0.030 in. (0.210 in. long) terminals
Lamp terminals	Tin-plated

* Performance Data — See Important-3 in the Industrial Controls catalog..

Termination

Units are available with quick-connect stab or PC board terminals.

Stab Terminations

0.110 x 0.020 in. solderable stabs are compatible with AMP connector Part No. 61060-1 or equivalent. These connectors will accept one #18 or two #22 AWG wires maximum. Contact terminals are gold-plated and lamp terminals are tin-plated.

PC Board Pin Termination

0.020 x 0.030 in. (0.210 in. long) require a 0.036 in. diameter hole for direct PC board mount or quick-connect PC board pin sockets (**Cat. No. 800A-N66**).

Stab and PC Board Pin Circuit Layout

Lamp Terminals *

* Lamp terminals are not provided on knob or key selector switches.

* 0.110 x 0.20 in. solderable stab terminals are compatible with AMP connector Part No. 61060-1 or equivalent.

† Compatible with PC pin connector Cat. No. 800A-N66. Available in packs of 50.

‡ Red flush head push buttons are not suitable for applications requiring extended head, or other unguarded buttons capable of being operated quickly in emergencies, and they may not comply with applicable codes or standards.

§ LEDs include internal current limiting resistors.

➤ Neon lamps are only available with clear, amber, or red lens cap.

Rotary Operators

The rotary operator kit provides a means to actuate rotary switches and potentiometers and maintains consistent panel appearance. The kit contains all necessary hardware to accommodate potentiometers, or multi-run switches (Type W potentiometers are available through electronic component distributors or Grayhill Series 50 rotary switch elements). Dimensional requirements of elements must comply with the switch in figures 1 and 2 shown on this page. Potentiometer or switch not included.

Note: For operator dimensional information, refer to page 42.

Note: Low security locks. Key interchangeability possible.

* Lock in left or right position. Key removable in either left or right position.

* **Special colors** — Selector switches and rotary kits are factory assembled with a white color insert as standard. Other colors are available factory assembled at no additional charge if ordered in quantities of five or more.

† Solder lug termination dimensions shown above are smaller than standard Bulletin 800A stab terminations.

Modifications and Accessories Closing Plugs

Cat. No. 800A-N1

Bulletin 800A closing plugs are designed to allow closure of an unoccupied operator opening on a panel or enclosure. This plug fits standard 16 mm openings and offers NEMA Type 13 rating when installed with the standard gasket and diecast mounting ring.

Description	Cat. No.
16 mm Closing Plug	800A-N1

Flip Covers

Cat. No. 800A-N42, -N12

Bulletin 800A operator flip covers offer nominal protection from unwanted operation while allowing operator visibility through a clear cover. The rectangular cover fits Bulletin 800A operators with square or rectangular bezels. Large square covers fit only large square push buttons.

Description	Cat. No.
Rectangular flip cover	800A-N42
Large square flip cover	800A-N12

PC (Printed Circuit) Board Pin Sockets

Cat. No. 800A-N66

These sockets are intended for use with PC pin style Bulletin 800A operators. Sockets can be secured directly to printed circuit boards providing mass termination benefits. Sockets can be secured to circuit boards by either soldering or with screw fasteners. Refer to the diagram on page 42.

Description	Cat. No.
PC (Printed Circuit) Board Pin Sockets	800A-N66

Note: Sold only in multiples of 50.

Rotary Operator Assembly Tool

Cat. No. 800A-N60

An assembly tool is recommended for rotary operators.

Description	Cat. No.
Rotary Operator Assembly Tool	800A-N60

Lamp Installation/Removal Tool

Cat. No. 800M-N5

Description	Cat. No.
Lamp Installation/Removal Tool	800M-N5

Custom Legend Kit

Cat. No. 800MS-N13

A legend marking kit is available to help create custom legend inserts. Each kit contains six grid sheets (four for use on the large square devices and two for use on the square, round, and rectangular devices). The grid sheets outline the working area available for adding a legend and also provides the necessary instructions and recommendations required to create custom legend inserts.

Description	Cat. No.
Custom Legend Kit	800MS-N13

Insulation Sleeve

Cat. No. 800A-N51

The insulation sleeve slips over the Bulletin 800A wiring terminals to provide electrical insulation from adjacent equipment.

Description	Cat. No.
Insulation Sleeve	800A-N51

Sold only in multiples of 20.

Mounting Ring Wrench

Cat. No. 800A-N50

This wrench simplifies the installation of the Bulletin 800A units and is recommended when close packing is required.

Description	Cat. No.
Mounting Ring Wrench	800A-N50

16 mm Push Buttons

Accessories, Continued

Modifications and Accessories, Continued

Large Square Color Lens Caps

Large square replacement lens caps include a white optic plate.

Cat. No. 800A-N10A

Description	Cat. No.
Amber w/optic plate	800A-N10A
Blue w/optic plate	800A-N10B
Clear w/optic plate	800A-N10C
Green w/optic plate	800A-N10G
Red w/optic plate	800A-N10R

Lens Caps

Replacement lens caps are available. Lens caps are packaged in multiples of five. Lens caps must be ordered in multiples of five only.

Example: (5) Catalog Number **800A-N20A**.

Color	Round	Square	Rectangular
	Cat. No.	Cat. No.	Cat. No.
Amber	800A-N20A	800A-N20A	800A-N20A
Blue	800A-N20B	800A-N20B	800A-N20B
Clear	800A-N20C	800A-N20C	800A-N20C
Green	800A-N20G	800A-N20G	800A-N20G
Red	800A-N20R	800A-N20R	800A-N20R

White Diffuser Inserts

Diffuser inserts, for improved legend legibility on illuminated surfaces, are available as a prescored sheet. The cat. no. as listed in the table below represents one sheet of six pieces. Diffuser inserts must be ordered in multiples of five. **Example:** (30) Round Diffuser Inserts would be (5) Catalog Number **800A-N25**.

Description	Cat. No.
Round diffuser insert	800A-N25
Square diffuser insert	800A-N35
Rectangular diffuser insert	800A-N45
Large square diffuser insert	800A-N11

Replacement Lamps

Use the table below to order replacement lamps. The cat. no. as listed represents one lamp. Lamps can only be ordered in multiples of ten.

Example: (20) six volt lamps would be ordered as (20) Catalog Number **800M-N15**. White LEDs operating on 24V AC/DC are available.

Consult your local Allen-Bradley distributor.

Lamp	Type	Operator Voltage	ANSI Number	Cat. No.
Incandescent*	Full voltage and transformer	6.3	86	800M-N15
	Full voltage	14	73	800M-N16
		24	85	800M-N17
Neon*	—	120	—	800A-N110
		240	—	800A-N120
LED†	Full voltage	6 AC/DC	—	§ 800T-N60x
		12 AC/DC	—	§ 800T-N61x
		24 AC/DC	—	§ 800T-N62x
		120 AC	—	§ 800T-N64x

* Wedge base (ANSI #85) incandescent lamps are subject to significantly shortened lamp life during 24V DC operation. Use wedge base LEDs for longer lamp life.

* Resistors are supplied with unit and must be connected in series with lamp. 120V neons use a 47K, 1/4 watt resistor, 240V neons require two 47K, 1/4 watt resistors; typical forward current 1.2 mA.

† LEDs have built-in current limiting resistors.

§ To complete the cat. no. replace the x with the first letter of the desired color: **A**mber, **G**reen or **R**ed.

Legend Inserts for Large Square Units

Standard legend inserts are only available for the large square units as listed below. To order, select the desired cat. no. from the table below.
Note: Standard legend inserts are not available for round, square or rectangular units, a custom legend kit (Cat. No. 800MS-N13) is recommended.

Legend Character Guidelines (Working Area)

The following approximate dimensions provide a guideline for determining the maximum usable legend area. The maximum thickness for legend films should not exceed 0.005 in. (0.127 mm). Dimensions in inches (millimeters). Dimensions are not intended to be used for manufacturing purposes.

Legend Markings

Large square selector switches and rotary operators may be engraved per the diagram below. Specify cat. no. and custom engraving. Character dimensions in inches (millimeters). Dimensions are not intended to be used for manufacturing purposes.

Bulletin 800A

16 mm Push Buttons

Approximate Dimensions

Approximate Dimensions and Shipping Weights

Dimensions in inches (millimeters). Dimensions are not intended to be used for manufacturing purposes.

Mounting Dimensions

- * Rotary switch depth without switch element or potentiometer.
- * Rotary switch operator only will vary in length behind panel according to element selection.

Panel Thickness Requirements — Devices will accommodate panel thicknesses from 1/16...3/16 in. (1.6...4.8 mm).

Mounting Torque Range — 10...12 lb-in. (1.1...1.3 N•m)

Operator	Dimension A	Dimension B	Dimension C	Dimension D		
				Push Button	Knob	Key
